PATENTED ARMoured DOORS

QUALITY

CERTIFICATION

Congratulations, you have chosen an EFFEPI armoured door, built using the newest techniques and made of high quality materials. Its finishing has been carefully checked and the door has been tested before leaving the factory; in the improbable event of a defect, we invite you to ask to the point of sale where you bought it.

In order to maintain your new door beauty and functionality, follow our simple pieces of advice:

- ✓ If you have difficulties in operating the lock, do not keep trying and call a technician, since the problem may be due to a faulty fitting of the door
- ✓ Do not force the lock
- ✓ Do not ever lubricate the lock and its bolts.

www.blindatoeffepi.com

-
- ✓ Do not use solvents on the polished surfaces, but ordinary furniture cleaning products.
 - ✓ If you need additional keys (beyond the 3 keys supplied), we suggest having them copied immediately.

EFFEPI armoured doors can be recognized from their beauty and their strength as well as from the company trademark on the frame.

All the EFFEPI doors are manufactured in Italy.

For further information and advice in respect of the functioning and maintenance of the product you bought, we suggest visiting our website:
